

Overview

Intellias® Job Automation simplifies job processing for any job runs including Payroll, ACBR Invoicing, AP Checks, LP Processing and more. The application resides on the web server and works seamlessly in your browser allowing you to run all jobs sequentially. Simple and easy to use, the Job Automation application requires no specialized training, reduces your costs, increases productivity of employees and provides greater data accuracy. Because the program applies the same job process every time, it reduces staff time and virtually eliminates all data entry errors.

Biweekly Normal Payroll Automation				
<small>Please note: As the automation continues to run, you will see report links appear in the Report column. You may click on any of the report links to view the reports of the application as it is running. This will not interrupt the application.</small>

Key Features

- Reduces common data entry errors, eliminating the need for reprocessing
- Delivers jobs timely and accurately
- Automatically adds, submits and runs a unique job name for each job
- Eliminates the need to jump between the parameter screen, the job scheduler and print manager to run a cycle
- Sends notifications, analyzes, distributes and archives output reports
- Processes multiple jobs sequentially from a single browser window and keeps track of the jobs run
- Autofills all job parameters for every job
- Tracks payroll progress, verifies job completion and accesses report links from one browser window
- Builds unlimited automations to address all variations of job run processing
- Runs scripts and Process Flows as needed
- Can be utilized by multiple business units (HR, Finance, Procurement)

This job automation process is awesome. Jobs are set up to start without me having to pull up old jobs, rename, save and submit them. Our organization processes 90 jobs to complete the payroll cycle each pay period. Prior to Intellias® I felt pressured to complete these tasks from start to finish. Today the pressure has been lifted and I look forward to using Intellias® each new payroll cycle.
